

Application and Maintenance Document – September 2021

HOMAPAL Magnetic Laminates

HOMAPAL Magnetic Laminates offer three surface types including gloss marker board, matt chalk board and matt projection surfaces. While the material is not magnetised, it will securely hold large- format documents, e.g. plans, posters and other objects with the use of a magnet placed on the surface.

The HOMAPAL Magnetic Gloss finish Marker Board surface is suitable for use as writing display panels in conjunction with “Dry Wipe”, or “Liquid Chalk” markers. They are suitable for all semi-permanent writing applications, around the home, office, educational or institutional applications. All markers must be Xylene Free.

Suitable Markers include:

- Expo Dry Erase Markers
- Texta Liquid Chalk Markers

The Dry Wipe and Liquid Chalk markers are also available in a range of vibrant and contrasting colours, allowing a wide choice of presentation techniques and styles to be explored. The modified melamine surfaces will not be affected by the repeated use of Dry Wipe or Liquid Chalk Markers as long as the correct cleaning procedures are adopted.

Only use soft damp microfiber cloths to wipe off the marker ink

- **HVG does not recommend the use of any Whiteboard Eraser or magnetic White Board Eraser type products**

The use of cleaners with a microfibre cloth is recommended as per the examples detailed below on a regular basis

- Quartet Board Extra Strength Board Cleaner
- Windex
- methylated spirits
- Isopropyl Alcohol
- For a deep clean on an annual basis or as required - Acetone is recommended.
- Avoid heavy rubbing of the surface with dry cloths
- Allow the ink to dry on the surface before removing
- Clean panels weekly as a minimum
- Do not use solvent-based markers under any circumstances
- Do not leave marker on the surface for more than 24 hours.

The HOMAPAL Matt Magnetic Chalk Board surface 8207 is designed as a projection surface only. It is not recommended as a writeable surface. The matt surface allows for a softer textural look.

The HOMAPAL White Matt Magnetic 8207 Projection Surface is designed specifically for use with data projectors and as a magnetic holding surface. It is not suitable as a writeable surface, refer to the specific information sheet on the HVG Building website. The HOMAPAL Matt Magnetic Projection surface minimises reflection making the projected image easier to read from any angle.

HOMAPAL Magnetic Marker Board Laminate features a highly durable modified melamine surface and is available in a range of colours and finishes.

The panel and marker system offers several other advantages including:

- Low odour
- Vibrant high contrast appearance
- Environmentally responsible nontoxic system
